

We cordially invite you

paEpsy 2019

Variation: Noise or Norm?

Joint Conference of the Sections Developmental Psychology & Educational Psychology

Leipzig, September, 09th - 12th, 2019

www.paepsy-meeting.de

A special focus of our conference will be "Variation: Noise or Norm?".

Through continuous theoretical, methodological and analytical advances in different research fields, cultures, environments, situations, and tasks have been identified as important sources of variation in developmental and educational processes. The joint PAEPSY meeting provides a forum to promote cross talk among researchers working on these diverse topics. We welcome all fellow researchers, students and practitioners to contribute.

Call for Papers

We will accept scientific contributions from all areas of developmental, aging, and educational psychology from **January 15th, 2019 until May 15th, 2019**. Please find further information about the call for papers [here](#).

Our goal is to provide a forum for cross talk for all participants interested in questions related to variability in developmental and educational processes. We are delighted to announce our confirmed keynote speakers who are each internationally renowned colleagues working on diverse topics related to the key conference topic. In addition, there will be invited symposia accompanying the keynote lectures.

We welcome submissions covering all areas of developmental and educational psychology and particularly encourage posters, papers, and symposia related to the key conference topic. Submissions in both German and English are encouraged.

You can add your wishes concerning the conference program here: [wish list](#).

We look forward to welcoming you in Leipzig!
